

AN/PVS-24 Day/Night Weapon Sight

The M2124 is a rugged, clip-on night vision device (CNVD) based upon the military nomenclature AN/PVS-24 used by U.S. Special Operations Forces.

The advanced design of the M2124 eliminates the typical requirement of removing a primary (day) sighting system since the CNVD mounts in line with a standard day optical sight. Combining day and night vision sights eliminates the need to re-zero, since the primary sight remains undisturbed. Additional advantages to supplementing a primary sighting system with the M2124 include maintaining a user's consistent eye relief and shooting position as well as retaining user muscle memory. By operating the locking quick-disconnect, single-throw lever mounting system provided, the M2124 easily attaches to a MIL-STD-1913 rail interface system. The unit may also be used as a hand-held observation device.

Key Features

- State-of-the-Art U.S. Technology
- Ultra Light Rugged Construction
- Gen III Image Intensifier Tube
- Manufactured to U.S. Military Specifications
- Bright Light Source Protection
- Automatic Brightness Control

Specifications

Technology	Generation III Auto-Gated
Magnification	1x
Field of View	40°
Objective	55 mm
Weight	1.7 lbs
Dimensions	2.9" x 3.5" x 5.8"
Power Source	1 x 3V Lithium
Warranty	1 Year Limited

Warranty: Purchasing this product entitles you to a 1 Year Warranty from the original date of purchase. At our discretion your equipment can be repaired or replaced with new or refurbished product or parts, if any product or parts are determined to be defective due to materials or workmanship. Shipping & handling is not included in this warranty.

Export of night vision equipment without a valid export permit issued by the Office of Defense Trade Controls, US. Department of State is strictly prohibited and is a federal crime under (ITAR) TITLE 22, Code of Federal Regulation, Parts 120-130.
